

Assignment: Pharmacy Store Landing Page with Admin CRUD

Position: Full Stack Developer **Time Allotted:** 6-8 Hours **Submission Format:** GitHub repository link + Live URL (if deployed)

Objective

Build a pharmacy landing page and a simple admin panel to manage products, testimonials, and contact messages.

Public Landing Page

Required Sections:

- Header / Navbar
 - Hero Section
 - About Us
 - Featured Products
 - Testimonials
 - Contact Form
 - Footer
-

Product Requirements

Fields:

- Name
- Price
- Image (URL)
- Description (use rich text editor such as TinyMCE, Summernote, or CKEditor)
- is_featured (boolean)

Data Requirement:

- Add at least 5 products
 - 4 products must be marked as featured
 - Only featured products should be shown on the landing page
-

Testimonials Requirements

Fields:

- Name
- Image (URL)
- Message

Data Requirement:

- Add at least 3 testimonials
 - Display all testimonials on the landing page
-

Contact Form (Dynamic)

Fields:

- Name
- Email
- Message

Requirements:

- Form must submit data to backend (API)
 - Store messages in database
 - Show success/error feedback to user
-

Admin Panel (/admin)

1. Product CRUD

- Create product
- View product list
- Edit product
- Delete product

2. Testimonials CRUD

- Create testimonial
- View list
- Edit testimonial
- Delete testimonial

3. Contact Messages (Read Only)

- View submitted messages
- Display: Name, Email, Message, Submitted date
- Delete message (optional)

API Requirements (Mandatory)

You must create backend APIs to handle all dynamic data.

Product APIs

- GET /products - Get all products
- GET /products/featured - Get featured products
- POST /products - Create product
- PUT /products/:id - Update product
- DELETE /products/:id - Delete product

Testimonials APIs

- GET /testimonials - Get all testimonials
- POST /testimonials - Create testimonial
- PUT /testimonials/:id - Update testimonial
- DELETE /testimonials/:id - Delete testimonial

Contact APIs

- POST /contacts - Submit contact form
- GET /contacts - Get all messages (admin)
- DELETE /contacts/:id - Delete message (optional)

Technical Requirements

- You may use any frontend and backend framework or programming language
 - Use any database: SQLite, MySQL, PostgreSQL, or others
-

Expectations

- Responsive design (mobile and desktop)
 - Clean and structured code
 - Proper API integration
 - Featured products logic must work correctly
 - Contact form must persist data
-

Deployment

- Deploy frontend (including admin panel)
 - Backend can be deployed or run locally (provide clear instructions)
-

Submission

- Live URL (if deployed)
 - GitHub repository
 - README with setup steps
-

Demo Video (Plus Point)

Record a short demo video (2-5 minutes) showing:

- Landing page
- Admin panel
- Product CRUD
- Testimonials CRUD
- Contact form submission

This is optional but will be considered a strong plus point during evaluation.

Time Expectation

6-8 hours

Evaluation Criteria

- CRUD functionality (products and testimonials)
 - Contact form data handling
 - API design and integration
 - UI/UX and responsiveness
 - Code quality and organization
-

Bonus (Optional)

- Admin authentication
 - Form validation (frontend and backend)
 - Image preview in admin
 - Loading and error handling
-
